SUMMARY

Systems and network administrator focused on Blue Team cybersecurity, with over 2 years of industry experience (apprenticeship, then fixed-term contract). Incident response, EDR administration and contribution to a SIEM deployment with a managed SOC provider, across a Windows and Linux estate. Automation of hardening, patch management and administration tasks with Ansible.

TECHNICAL SKILLS

Blue Team Cybersecurity: SIEM, EDR, privileged access bastion, incident response (IR) and playbooks, MITRE ATT&CK, CIS hardening, ANSSI and GDPR compliance

Systems & Networks: Linux (Debian), Windows Server, Active Directory, DNS, DHCP, VMware vSphere, Docker, firewall, reverse proxy, monitoring

Automation & Cloud: Ansible, software deployment packaging, MDM, Windows application control, Azure, Git (GitHub, GitLab), Python

Currently learning: Terraform, AWS

PROFESSIONAL EXPERIENCE

Systems & Network Administrator (fixed-term contract) – **IDEA Logistique**, Montoir-de-Bretagne, France **08/2026 – 12/2026**

Scope: Windows and Linux workstations and servers (production, test, development)

- Handled security incidents (incident response) on EDR alerts
- Took part in deploying a SIEM with a managed SOC provider
- Administered the EDR: deployment, updates, exclusions, policies
- Built an audit of EDR agent connectivity to the console, deployed as a software package across the whole estate
- Deployed a Windows application control policy through the MDM
- Automated Windows patch management
- Created network rules on the firewall

Apprentice Systems & Network Administrator – **IDEA Logistique**, Montoir-de-Bretagne, France **09/2025 – 08/2026**

- Level 3 support, IT operations and maintenance, incident response
- Automated the exposure of SFTP servers through a reverse proxy
- Automated the privileged access bastion (resource creation)

IT Support Technician (helpdesk), intern then apprentice – **IDEA Logistique**, Montoir-de-Bretagne, France **2024 – 08/2025**

- Level 1 user support and system image (master) preparation
- Built a production-like test environment for the ITSM tool
- Migrated the MDM solution

PERSONAL PROJECTS

suzune_check – Automated Linux security checks and baseline compliance audits with Ansible

ansible-role_vm-provisioning – Ansible role for VM provisioning

iia_detect-bruteforce-ssh – SSH brute-force attack detector in Python (school project)

EDUCATION & CERTIFICATIONS

Bachelor's degree in Computer Science, Cybersecurity track – IIA, Saint-Nazaire, France **2026**

BTS SIO SISR (2-year IT diploma, Systems & Networks) – IIA, Saint-Nazaire, France **2025**

GDPR MOOC (L'atelier RGPD) – CNIL (French data protection authority) **2024**

LANGUAGES & INTERESTS

French: native · **English:** B2 · **Japanese:** learning

Interests: game creation, video games (Dark Souls trilogy), anime and manga (Frieren, NieR)
